Services

Your Vision, Our Services: Making Dreams Reality

Mobile App Development

Due to the prevalence and development of smartphones over the past few years, smart applications have gained a unique place in people's lives.

Solution Architecture & PoC

Most businesses today are turning to the digital world to solve existing challenges, expand their market, and meet customer needs.

The Discovery Phase Of a Software Project

Currently, many software projects face high risks and costs due to failure to pass the discovery phase successfully.

Web Development

In today's digital age, a website is not just a nice-to-have, it's a must-have for any business looking to reach and engage with customers online.

Staff Augmentation

A company may desire to expand its technical team but wish to avoid taking on the additional responsibilities associated with growing its workforce.

Maintenance and Support Services

By applying the best support practices, our profound tech knowledge and deep experience, you can be sure that everything is under full control whenever you need it.

2. Yoga and meditation (guidance, practice, communication with the coach, performance recording, etc.);
3. Health file and health progress report;
4. Real-time chat in groups and one-on-one.

Case Studies

PriceMyCar (Case Study)

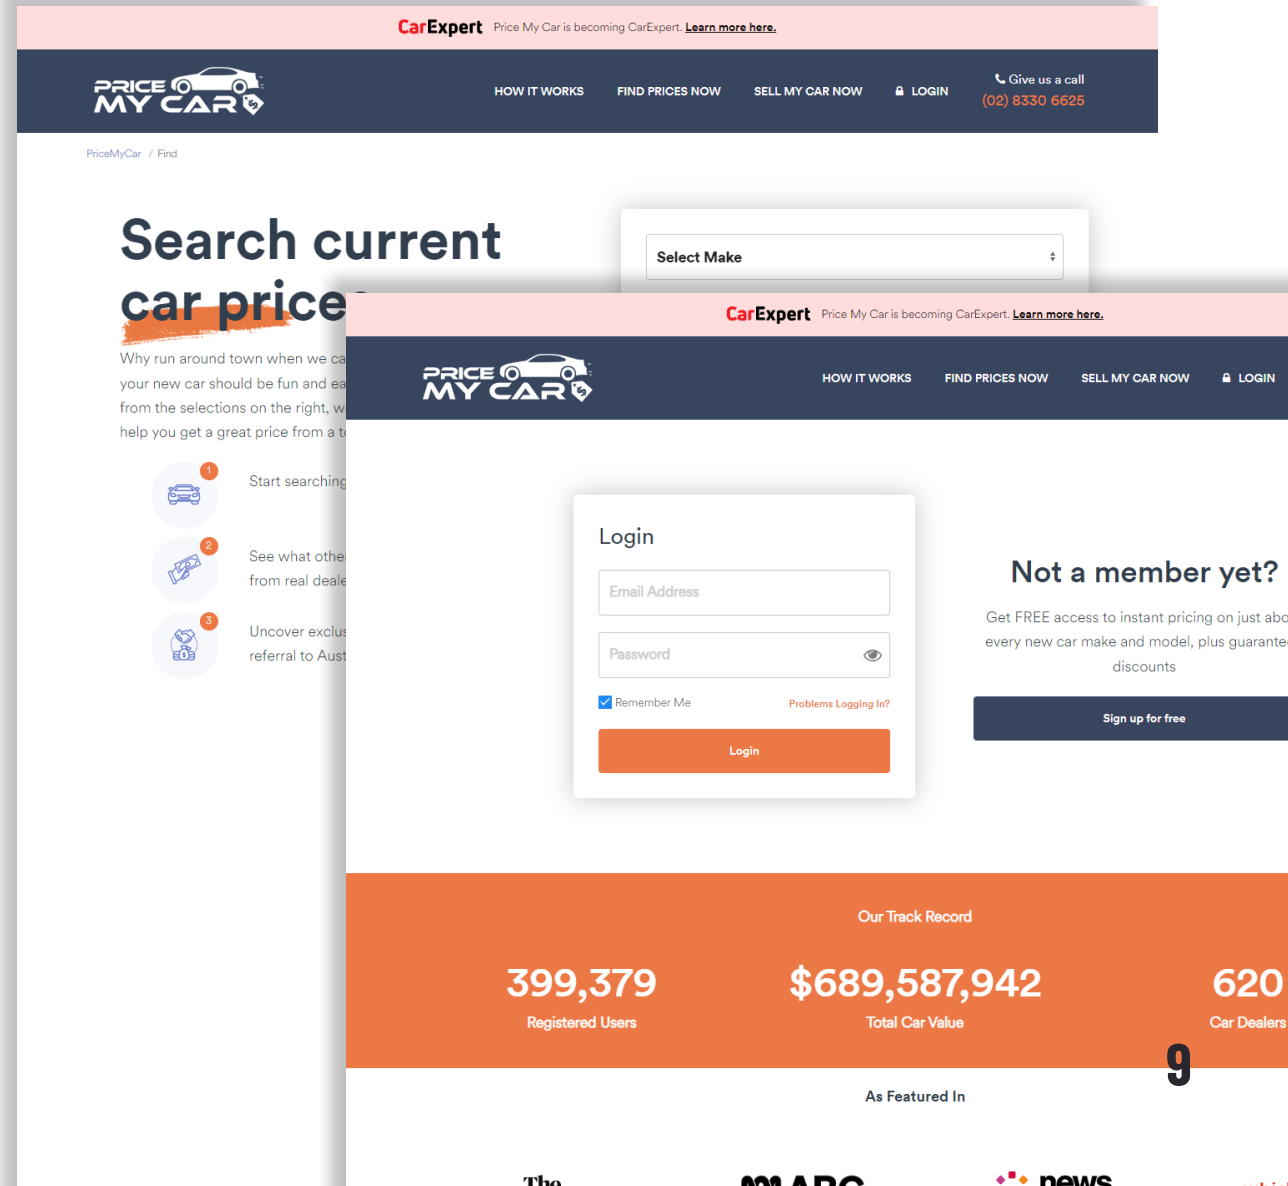

- **Tech Stack:** Python, Laravel, PHP, MySQL
- **Deliverable:** Web App
- **Customer Country:** Australia
- **Target Audiences Country:** Australia

Case Studies

Description

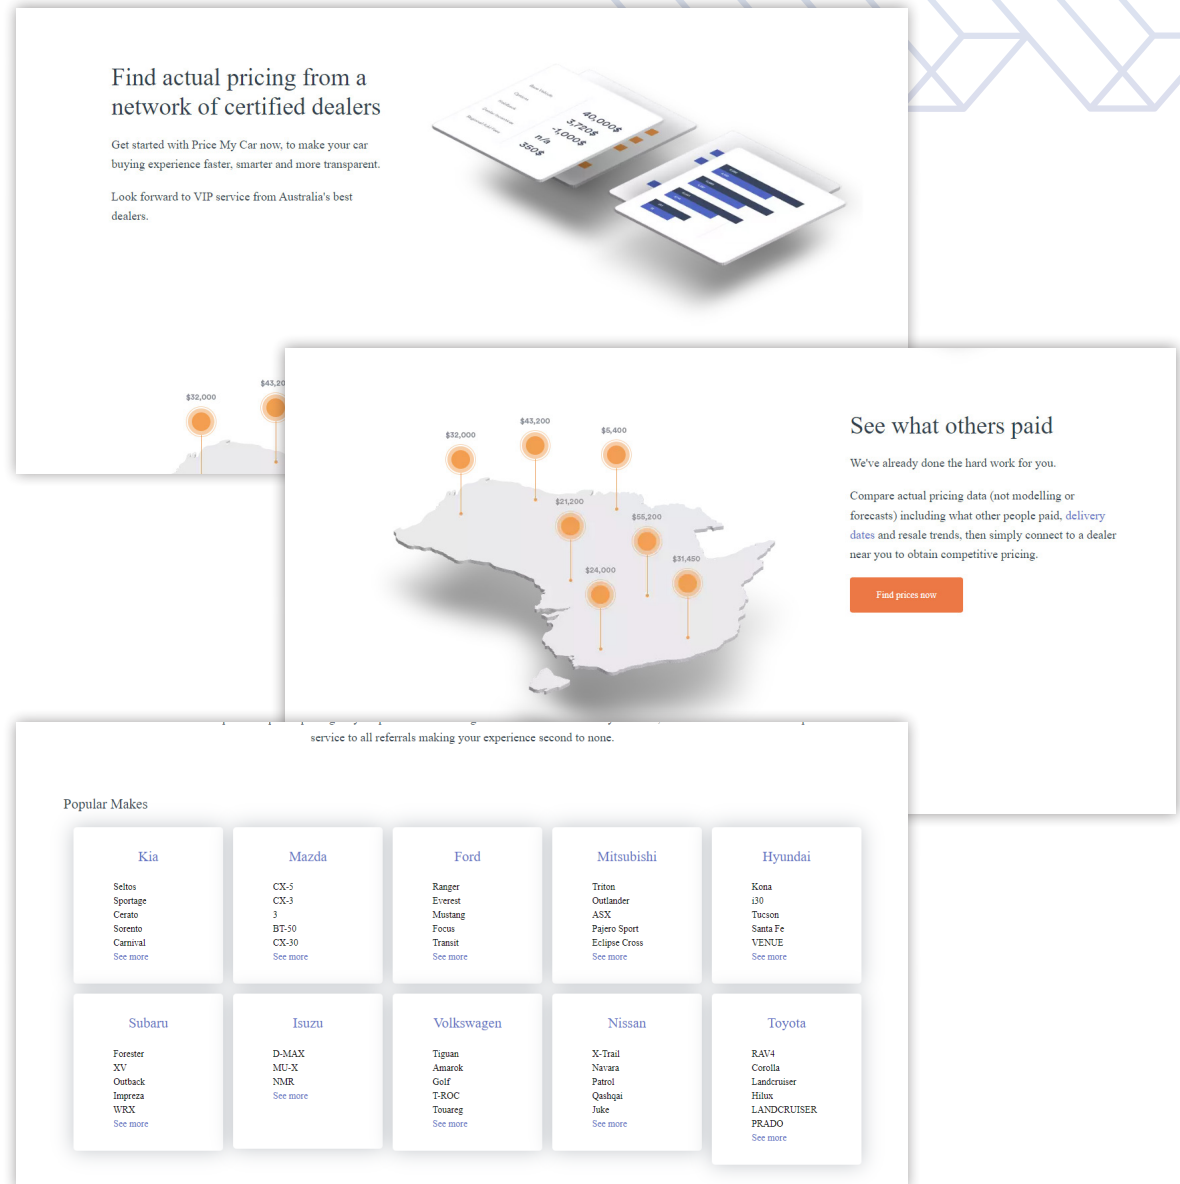

PriceMyCar is an excellent website that helps users accurately determine the market value of their vehicles. PriceMyCar database includes thousands of car brands and models, providing users easy access to comprehensive pricing information. Our platform also allows users to compare prices from numerous dealerships across Australia, and it ensures transparency and empowers users to make informed decisions. PriceMyCar helps users save millions of dollars by closing the gap between the actual prices of cars and the prices quoted by sellers.

Case Studies

Key Features

1. Estimating your car's value and observing other car's values;
2. Introducing the perfect choices for purchasing a car;
3. Connecting car purchase requests with the most relevant dealers at the state level;
4. Accessing complete and classified information regarding various cars and models;
5. Supporting and digitizing the crucial aspects of the car buying and selling process.

Case Studies

Twiva (Case Study)

- **Tech Stack:** Flutter, Laravel, PHP
- **Deliverables:** Android, iOS

3. Ability to install and update games;
4. Implementing a gamification system to get more user interaction (scoring users based on their performance in different games);
5. International payment option;
6. Offering a highly intelligent and advanced game search feature for users;
7. Providing unique suggestions based on the user's profile and performance history.

Case Studies

Utilitarian (Case Study)

- **Tech Stack:** Flutter, Laravel, PHP, MySQL
- **Deliverables:** Android, iOS
- **Customer Country:** Australia
- **Target Audiences Country:** Australia

Case Studies

Description

Utilitarian: Empowering Sustainable Actions for a Circular Economy.
Utilitarian is an innovative app designed to empower individuals to enhance personal sustainability and actively participate in the circular economy. With its user-friendly interface, the app offers a range of functionalities that enable users to positively impact the environment and contribute to saving the planet.

Key Features

1. Users can discover campaigns in their vicinity and join them;
2. Users can register their products in the app and access their user manual, purchase receipts, or even warranty information anytime and anywhere;
3. Users can gift a product to another user and invite them to enjoy the app;
4. Additionally, users receive a prompt message and notification if any issue is detected with any of their products.

Slimbeauty (Case Study)

- **Tech Stack:** WordPress, Flutter, Laravel, PHP
- **Deliverables:** Web app, Android, iOS
- **Customer Country:** Syria
- **Target Audiences Country:** Syria, Iran

Description

Slimbeauty is an ideal solution for bariatric surgery and beauty surgery applicants. Slimbeauty is also an intelligent assistant for doctors to provide better quality patient services.

Slimbeauty allows users to choose the best bariatric and cosmetic surgeon. Doctors can offer pre-operative consultations and post-operative care through video, voice calls, and text messages. Slimbeauty is the best solution for bariatric surgery and beauty surgeries.

Key Features

1. Conversation with the doctor by text and video call;
2. Patient follow-up and health monitoring;
3. Health file and surgery file;
4. Management and supervision of pre- and post-surgery actions;
5. Finding the best surgeons and connecting with them.

Case Studies

Flitt (Case Study)

- **Tech Stack:** Flutter, Laravel, PHP
- **Deliverables:** Android, iOS
- **Customer Country:** Australia
- **Target Audiences Country:** Australia

Description

If you need to transport bulky items that won't fit in your car, the Flitt app provides the best way to outsource the delivery.

The Flitt Driver program is an auxiliary program for the Flitt platform that assists drivers in earning more money and saving time through intelligent routing.

Key Features

1. Calling a car to move items of all dimensions;
2. The driver version lets the driver receive information about the closest routes and orders;
3. Ability to automatically calculate the price based on order details;
4. Assisting the driver in navigating the route from the origin to the destination;
5. Comprehensive management panel to manage orders, customers, and drivers.

Case Studies

Infood (Case Study)

- **Tech Stack:** Flutter, Laravel, PHP, MySQL
- **Deliverables:** Android, iOS
- **Customer Country:** Syria
- **Target Audiences Country:** MENA Region

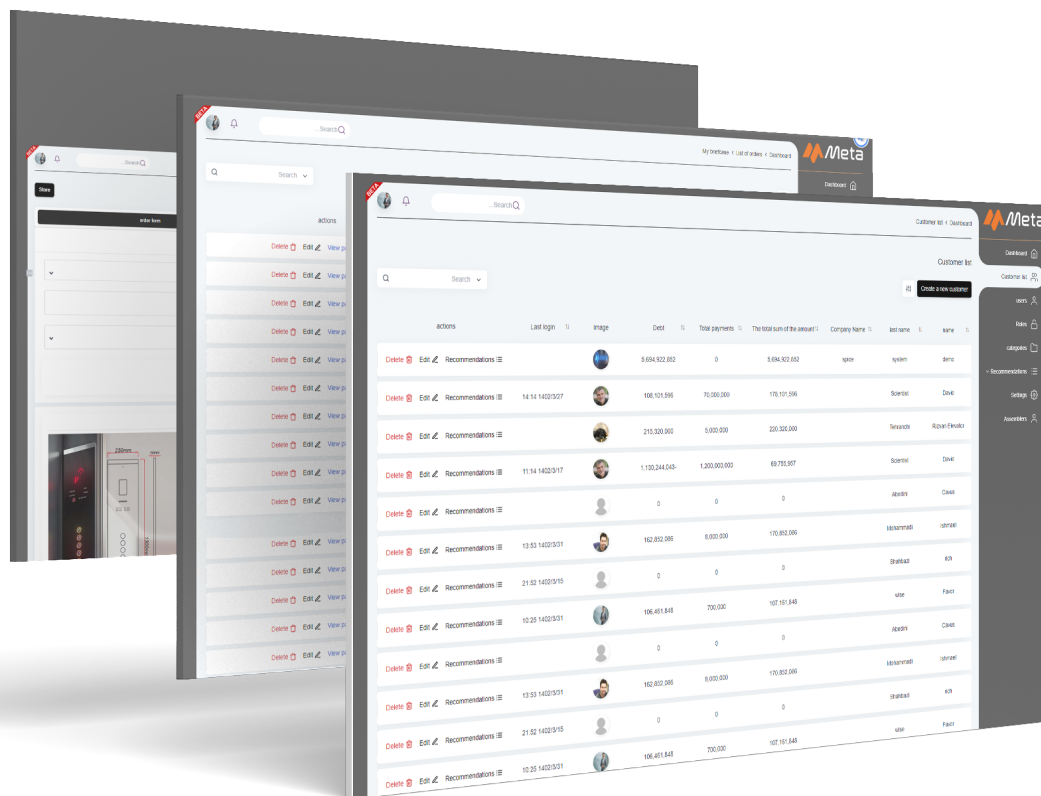

Description

Infood provides food information. Although food labels contain important information for people's health, they are often complex and difficult to read. Infood gathers and presents information to users clearly, straightforwardly, practically, and easily understood. The application collects personal and food-related information and allows individuals to determine the food units that meet their body's needs based on their personal characteristics.

Key Features

1. The most comprehensive food database;
2. Integration with the USDA nutrient database;
3. Capability to search, filter and scan food items;
4. Comparing different foods and suggesting healthier alternatives or similar options;
5. Providing information on food allergies and food restrictions;
6. Personalization of prohibited foods and diagnosis of food health.

Case Studies

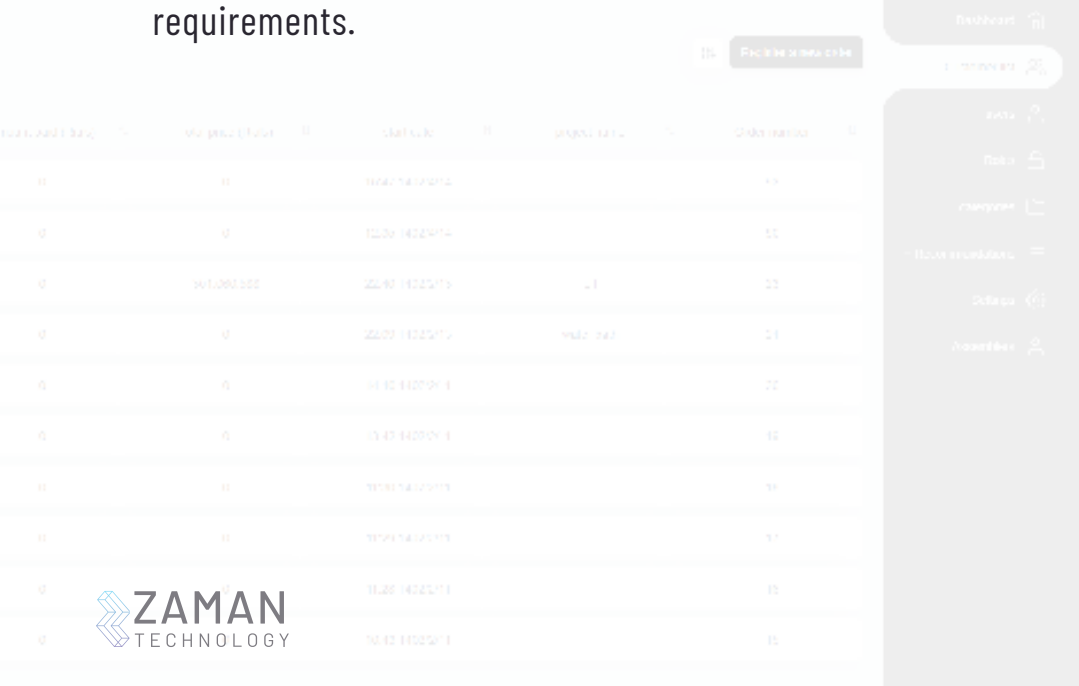

MetaLift (Case Study)

- **Tech Stack:** Tailwind, React js, Laravel, PHP
- **Deliverable:** Web App
- **Customer Country:** Canada
- **Target Audiences Country:** Canada, USA

Description

MetaLift: Ordering Elevator Panels Anywhere with Ease

Metalift software enables customers to order elevator panels from their homes conveniently. The software lets customers select from various panel options, including different designs, materials, and specifications. Customers can explore the technical details and appearance of the panels and choose based on their specific requirements.

Case Studies

PMPEast LMS (Case Study)

- **Tech Stack:** Vue js, Laravel, PHP
- **Deliverable:** Web App
- **Customer Country:** Kuwait
- **Target Audiences Country:** MENA Region

Description

The PMPEast LMS system, as a learning management system, specializes in the field of management and business. Professors and expert mentors can present their training courses on this intelligent platform. The platform is highly intelligent and evokes all the elements of a live training course for the student. The platform offers features allowing professors to integrate various teaching techniques, such as testing, student interaction, and practice, into their preferred learning scenario to attain the highest and optimal level of learning.

Key Features

1. The professor can provide various forms of content (such as text, audio, video, and images);
2. Ability to arrange all types of assignments, exams, and tests;
3. The communication between professors and students can be done through video calls, text messages, and voice messages;
4. The professor can create flexible learning scenarios.
